

June 8, 2013

My experience with Dorene over the last several months has been nothing but great. My company had a good size website in FrontPage that is around 18 years old that I needed converted over to Expression Web, and Dorene worked with me exactly like I wanted. She did the complete conversion, keeping everything intact for this first stage. We launched the newly converted site and it works perfectly. She's very fair and efficient.

On my old FrontPage site I made a lot of small changes on a regular basis so I wanted to continue to do this in Expression Web, which I'm now doing with some tutoring from Dorene. Dorene and I have plans to do modifications to this website in the near future and other websites I have. We are also working on practical, real payback SEO planning. She's an asset to our team.
