

Thorough, responsive, professional, efficient and very reasonably priced. What more could you ask for? I highly recommend Dorene to anyone who needs website development.

I am a do-it-yourselfer but also realized that I didn't want to have to learn all the technical details of Expression Web. Dorene was a perfect fit. She worked with me at the level I wanted. When I would get a little off track with development, she would gently guide me to keep my website up-to-date with the latest standards.

Dorene was great to work with, from start to finish. She is the type of professional who anticipates your needs and works with you in the way and at the level you want to be served. I highly recommend her.
