

My website looked dated. I had designed it in Dreamweaver from a template in 2007. It was not mobile friendly. I wanted someone to update the site to a mobile friendly modern design. I needed a new shopping cart as well. Dorene Matney was recommended to me by Rich LaRue. I gave her a try.

Dorene is everything Rich said she is and more. What a pleasure it was to work with her! She is intelligent, one of the few people I have ran across in my experience who actually LISTENS TO YOU. She modernized my website, made it mobile friendly, made a nice web store, and kept it simple just as I asked! She kept to the budget we originally discussed. She helped me with some of the grammar too. And she SPEAKS PERFECT ENGLISH.

Along the way Dorene explained how the website was designed so I can maintain it. Her code is well documented and logically organized. It will be easy to maintain. All this she did in a professional and timely fashion on budget. What more can one ask for?
